Valid until replaced

STATEMENT

The chemistry of Sasa PET BG-76/80/84 polymer chips products (Cas nr. 24938-04-3) are polyethylene terephthalate (PET). PET polymers are regulated under the Apparatus and Containers/Packages Section of the Food Sanitation Act and relevant legislations. It is indicated that PET polymers may be used as, or components of materials for parts in direct contact with products.

According to the explanations above, the verification of compliance regarding the legislations is within the responsibility of the manufacturer of the final plastic material. The examination has to be done in accordance with the specifications as laid down for the intended conditions of use.

Our product is listed in Appended Table 1 section 41 Polyethylene terephthalate.

In case of further questions, please do not hesitate to contact us.

Yours sincerely,

Gamze Çelik
